Job Summary

About PFG

PFG Precision Optics, Inc. is a manufacturer and coater of ultra-high precision lenses and prisms, which are installed in various types of equipment. Industries in which these optics are used include military, test & measurement, semiconductor, imaging, medical and telecommunications.

Job Summary

We are seeking a Quality Inspector who will be working on site in our Inspection Department. It is the inspector's responsibility to check the dimensions and surface quality of glass parts we make against their print and record the information.

The position has great potential for long term growth with the company and provides the ability to build a new skill set. In addition, we offer great benefits for our employees, including paid holidays, paid vacation, health care and other benefits.

Essential Skills and Requirements

- High School Diploma, GED or relevant vocational training
- Good eyesight, including near vision and depth perception
- Ability to work in a low-light setting
- Methodical and detail-oriented
- Self-motivated and driven
- Mathematics knowledge and background preferred
- Proficiency in the use of standard computer software preferred
